LLM Budget Dashboard System

TEAM MEMBERS

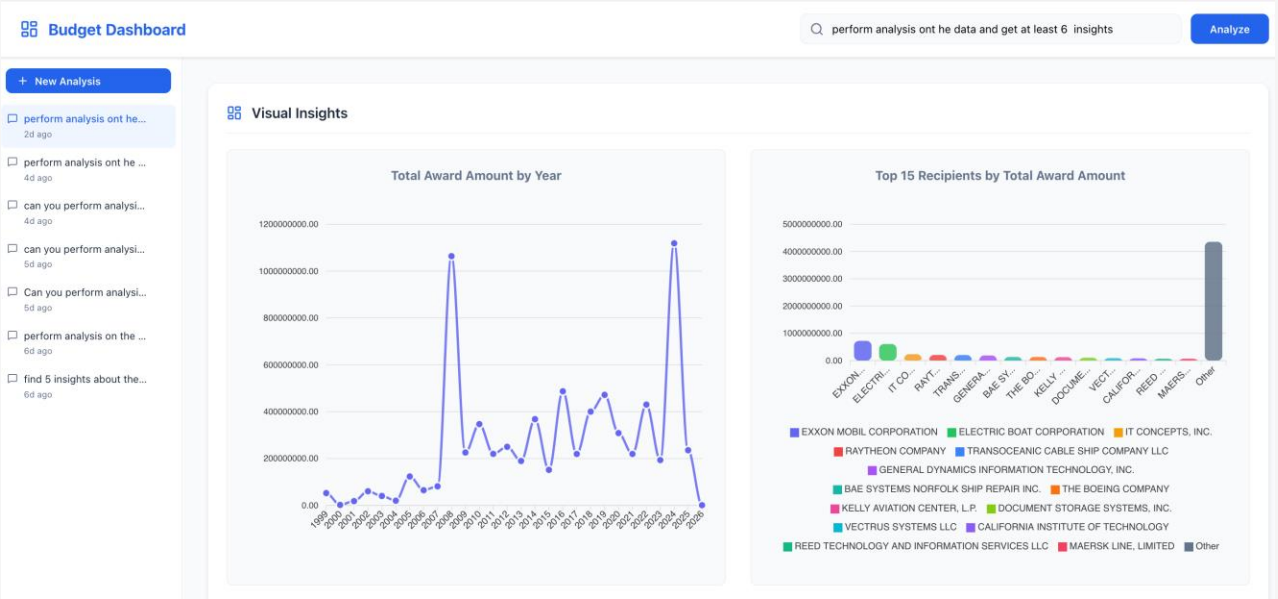
Jose M. Pitt, Manasi Indalkar, Maxwell Miler, Alex Qu, Andres Alban, Rohit Sattuluri, Garv Atri, Pragathi Rao, Sanketh Patil

Introduction

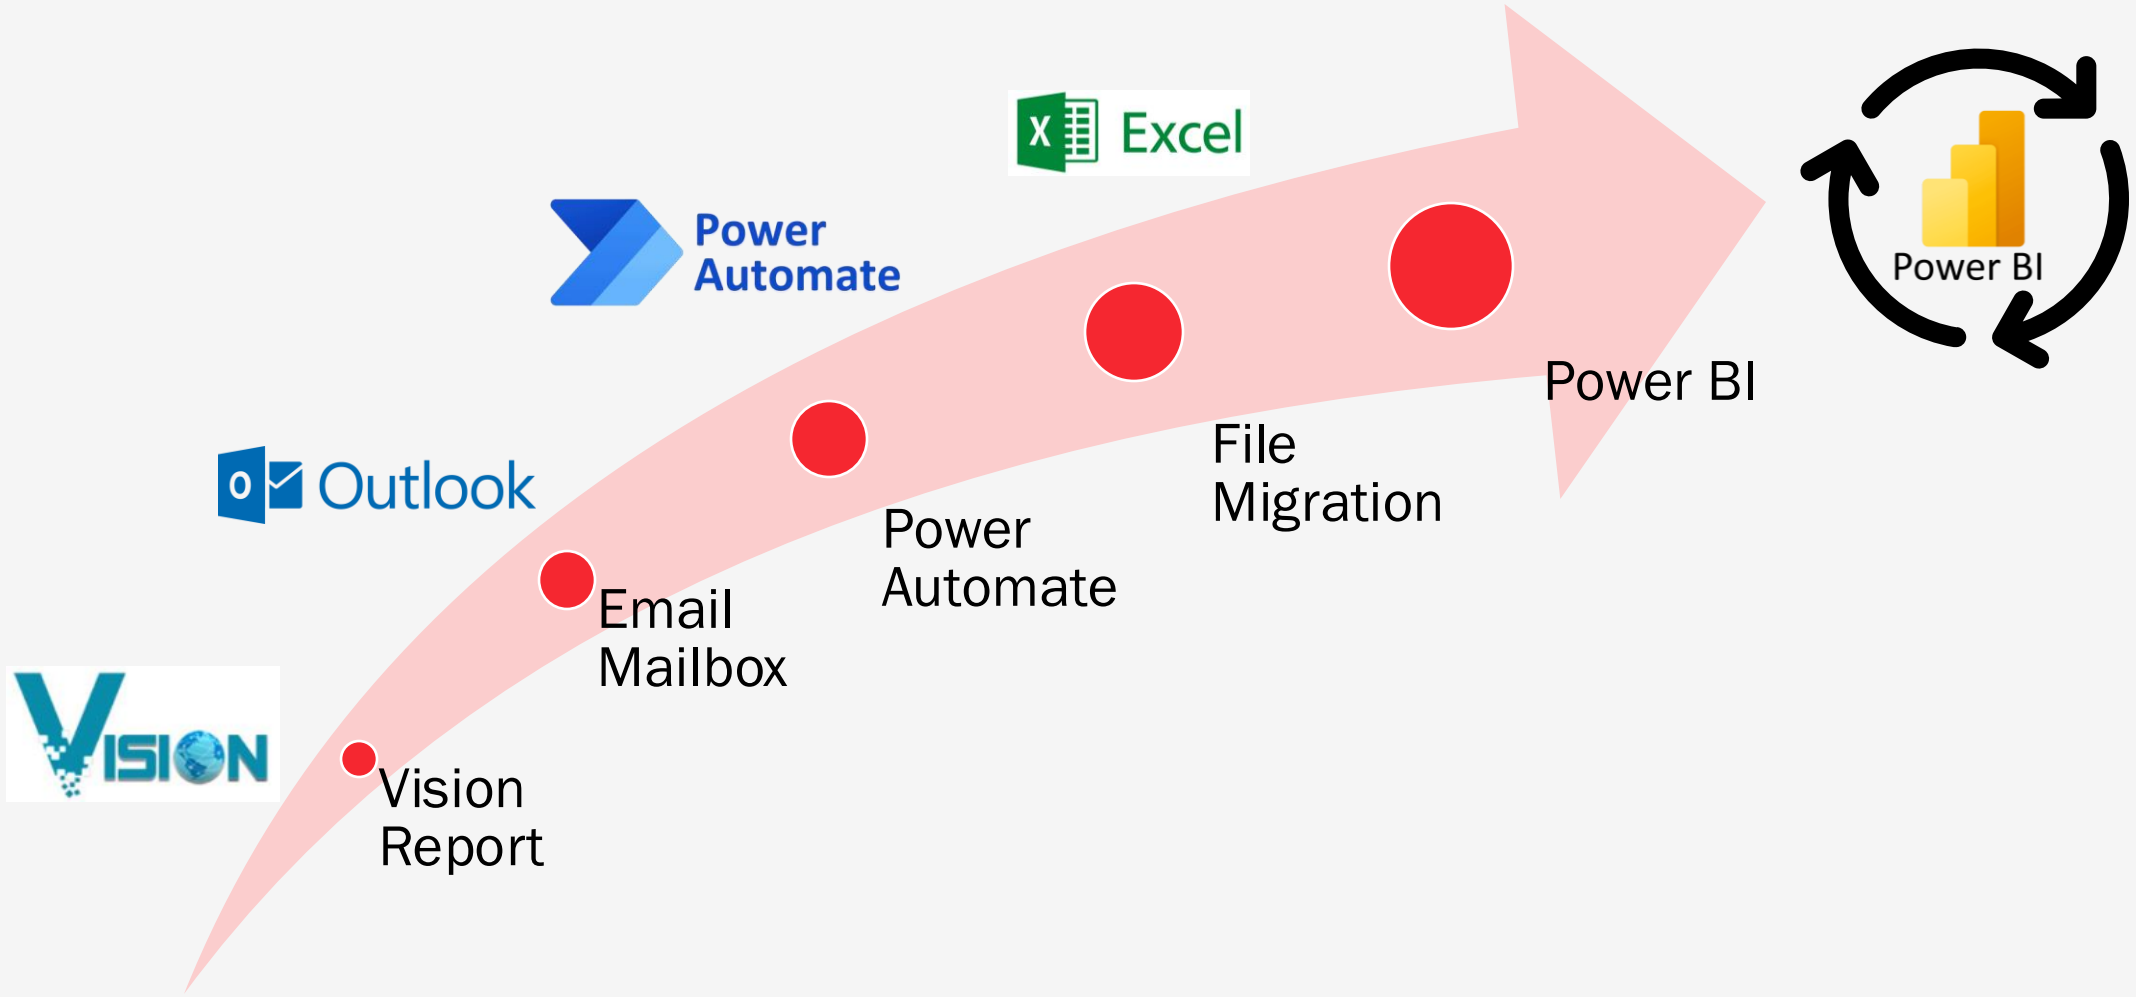
Collects and organizes information in one place

Display information through visual charts and metrics

Helps executives and teams make data-driven decisions



Fall 25 Project



Solution Workflow

Collecting Data

Data
is uploaded by
the user
in several format
(csv, xlsx, xls)

Analysis

LLM layer

1. Preprocesses
2. Analyzes
3. Create graphs
4. Forecasts
5. Summarizes

Future Outlook

Total Award Amount by Year Forecast Upward

Growing ~13,289,724 USD/period; projected to reach 508,704,623.71 USD by 2031

PROJECTED (2031)	95% CI	R^2
508,704,624 USD	13,283,899 – 1,004,125,348	0.16

Analysis Report

Executive Summary

This report analyzes government award data, revealing a highly concentrated distribution of funds among top recipients and significant yearly fluctuations in spending. While EXXON MOBIL CORPORATION leads with over **$724,234,597 USD** in total awards, the bulk of the funding, $4,356,049,468 USD, is distributed among a wide range of other contractors. Total annual awards show extreme volatility, peaking in 2024 at $1,118,596,218 USD. A forecast projects a slight upward trend in spending, though with low confidence.

Top 15 Recipients by Total Award Amount

The analysis shows a significant concentration of funds

Real World Impact

30 Seconds

- **To get detailed and informative reports on data**

Adaptable to Any Domain

- Not hardcoded on one dataset

Automated Forecasting with Confidence Metrics

- Produces projections with confidence intervals

Democratizes Data Analysis

- Non-technical users can ask questions about data in plain English

Conclusion

What We Built ?

- AI-powered EDA tool
- Natural language data questions
- Detects patterns and Anomalies

What We learned

- AI and Python Integration to create full stack app
- Dashboard design to illustrate trends
- Team Collaboration
